

CONVEYOR SYSTEMS

FPA proudly presents a conveyor system without peer in the industry. A new and revolutionary conveyor is now available to food companies worldwide. This new system provides the following unique features:

Better Sanitation

- Stainless steel and anodized aluminum construction
- Sealed side rails as main support members
- Enclosed wire and pneumatic passages
- Reduced horizontal components and dirt collectors
- Polished stainless steel legs
- Optional metal detectors, catch cloths or crumb trays are available

Appearance

- Smooth and clean
- No paint or corroding surfaces
- Concealed fasteners and wiring
- An engineered solution

Flexibility

- Designed to accept multiple attachments and surfaces
- Can be quickly changed into a different style conveyor without complete disassembly
- Engineered assortment of ends including nosebars, rollers, retraction mechanisms, and more

Ease of Installation

- Light weight, yet very strong
- Can be ceiling, floor, or wall supported
- Installs in significantly less time than conventional systems
- Reduced number of fasteners and components

Safety

- Direct drive eliminates hazards
- Pre-wired E-stops
- Operator manuals provided with conveyors
- Training is available

Controls

- Basic or advanced
- Relay or PLC
- NEMA 12 with NEC compliance
- Complete, UL listed panel shop
